

## EUROPEAN CHRONIC PAIN SURVEY

Pain Alliance Europe (PAE), the pan-European patients' organization representing patients with pain-related conditions, has launched an **European-wide survey** on health issues related to chronic pain, available in several languages. PAE are one of European Pain Federation and Lithuanian Pain Society as member key partners at European level, and have member organizations in most European countries.

Lithuanian participation could encourage creation of chronic pain patients' organization in our country. That's why I invite to promote the survey among members of Society and encourage to participate patients and all those who are concerned about the problem of chronic pain. The outcome of the survey will be analyzed and the results will be used to raise more awareness among politicians and policy makers.

An introduction to this survey and a link to the list of languages can be found on:

[http://www.pae-eu.eu/?page\\_id=400](http://www.pae-eu.eu/?page_id=400)

Alternatively, you can go straight to the English survey here: <https://www.surveymonkey.co.uk/r/PAE-English>.

If you have any queries regarding interpretation of the survey, please do not hesitate to contact Lithuanian Pain Society by: [skausmodraugija@epastas.lt](mailto:skausmodraugija@epastas.lt)

Assoc.Prof. Arunas Sciupokas  
President of Lithuanian Pain Society
